Location: Canada + Wherever I'm needed.

OBJECTIVE

Learner, problem solver, leader, and maker of reality. In essence, aiming to be a force of net good to the world by broadening my knowledge to contribute to areas of technology such as AI/ML, data science, software engineering, web dev, cyber security, robotics, game dev, and bio-informatics.

EXPERIENCE

- **Brunswick St. Baptist Church** Jul. 2022 - Aug. 2024
Volunteer Fredericton, Canada
 - Provided piano accompaniment for congregation every other week.
 - Ensured Sunday school cleanliness for 100% of attended sessions.
- **Chinese Cultural Association of New Brunswick** Sept. 2021 - Jun. 2022
Kung Fu Coach Fredericton, Canada
 - Trained a team of 10+ students in rudiments Kung Fu stances and sequences.
 - Invited to appear on local lunar new year gala.

EDUCATION

- **University of Waterloo** Sept. '24 - Apr. '29
Computer Science Waterloo, Canada
 - GPA: 3.92/4.00
- **Fredericton High School** Jun. 2024
Secondary Education Fredericton, Canada
 - Valedictorian 

PROJECTS

- **Elementle: Wordle-inspired site for element guessing. Play here.**  Feb. 2024 - Present
Tools: HTML, CSS, JS, Python, Flask 
 - Developed flask back-end to generate mystery element seeded on current date.
 - Created JSON storage for all recent mystery elements thus delaying element repetition.
 - Drove a 175% increase in average player count by implementing a python twitter bot to post previous day's element.
- **Impossible Tic Tac Toe: Your preposterous line of three. Read more here.**  Jan. 2025
Tools: Python, Pygame 
 - Inspired by Harvard's CS 50 AI course.
 - Implemented minimax algorithm for AI to always win or tie.
 - Optimized algorithm to find quickest win and prune unnecessary computations with alpha-beta pruning algorithm.
 - Integrated visuals using pygame and developed reusable buttons using OOP.
- **Theorem Solver: Calculator for computing mathematical theorems. Read more here.**  Jan. 2025
Tools: HTML, CSS, JS, Python, Flask, LaTeX 
 - Wrote all algorithms to compute the results of mathematical theorems with given input from user.
 - Implemented POST method and handling of input.
- **Flappy Arms: Flappy Bird remix with webcam. Control bird by doing push ups. Read more here.**  Oct. 2024
Tools: Python, Pygame, OpenCV 
 - Inspired by social media trend. Developed during reading week.
 - Implemented mapping of face position to bird height.
 - Exported .exe for distribution, refer to above link to read more.

SKILLS

- **Programming Languages:** Python, C++, C, JS, Java, Racket
- **Web Technologies:** Django, Flask, CSS, HTML
- **Database Systems:** SQLite, JSON
- **Data Science & Machine Learning:** OpenCV
- **Cloud Technologies:** PythonAnywhere
- **DevOps & Version Control:** Git
- **Other Tools & Technologies:** Linux, LaTeX, MuseScore

HONORS AND AWARDS

- **Valedictorian** Jun. 2024
Fredericton High School [🌐]
